

ENVIRONMENTAL POLICY

The Quality, Health, Safety and Environment Policy is aimed to ensure conformity of the product quality to all applicable, relevant requirements, to promote the company's products in the marketplace, to improve relations with its customers and suppliers, to reduce its environmental footprint, as well as to implement, maintain and enhance labour safety, health protection and working conditions for its employees.

The quality and competitiveness of the company's products is ensured by an efficient, approach based management system complying with the standards and requirements of ISO 9001:2015. The company's management team regularly monitors and improves the quality of the management system. High-quality resource management and continuous improvement of technological processes ensure the effectiveness and efficiency of the production cycle. The quality of the products and the efficient use of resources is ensured and lived through an appropriate understanding of all employees. The company's management is fully aware that its manufacturing processes have an impact on the environment. It is firmly committed to operate the company in such a way that its engineering and production approaches are socially responsible and conform to all applicable environmental, labour safety and health protection requirements.

All employees are committed to minimise the ecological footprint by observing the following rules:

1. Comply with statutory and other applicable requirements for environmental protection and natural resource management;
2. Carry out systematic assessment of their activities in order to minimize negative environmental impacts;
3. Ensure continuous improvement of the company's management system;
4. Notify the management of any potential environmental impact.

Turbotect Ltd. undertakes to carry out its operations in such a way as to prevent any damage to the health of its employees by:

- Complying with statutory and other applicable requirements for employees' labour safety and health protection;
- Ensuring labour safety and health protection for all its personnel and persons;
- Performing systematic monitoring, hazard identification and assessment of risks for the health of its personnel of the personnel's professional activity and health;
- Enforcing management decisions to mitigate or eliminate identified risks.

The company's management team is eager to develop the professional skills and knowledge of its employees. Turbotect Ltd. seeks to motivate its employees to high-quality performance. The management of Turbotect Ltd. is committed to the principles of quality, health, safety and environment management.
